Headteacher: Sue Lucas

Dear Parents / Carers,

As from Monday we will all be asking that all pupils who need to come into school and college follow the same advice and guidelines that all staff who are caring for your children are. Both staff and children should:

- Wear newly laundered clothes each day
- Tie up long hair
- No jewellery should be worn

Also Government advice states that when we all arrive home from school and college we should follow these guidelines:

- As soon as they step into the home, all clothing removed and put straight into the washing machine
- The adult who puts the clothes in the washing machine should avoid coming into contact with the child's clothing and then thoroughly wash their hands
- The child should then be bathed/showered straight away (including their hair)

In conforming with all strict government and public health advice we can all help in stopping this virus eventually and returning to a healthy, safe and happy world as soon as possible.

Once again, can I thank those of you for your support in caring for your own children within the safety of their own home and thus reducing the spread of infection and if any of the families of the children currently in school can also do this then that would also be a great help as well. We can all help each other by keeping everyone safe from contaminating each other.

Yours sincerely,

Sue Lucas

Sue Lucas Headteacher.
